\$64.58

Product description

Features:

- * Cumulative Kilowatt-Hour Monitor
- * Power factor
- * Forecast Your Costs
- * Calculates electricity expenses
- * Displays volts, amps and wattage within 3% accuracy

Specifications

- * Operating voltage: 120V acv
- * Frequency display: 60Hz
- * Operating current: max 15A
- * Wattage display (watts): 0W---- 1800W
- * Voltage display (amps): 0.000A---15.000A
- * Minimum wattage display range: 0.0W-9999W
- * Price display range: 0.00€/KWH----99.99€/KWH
- * Total KWh and cost display: 0.000KWH----9999KWH, 0.00€----9999€

8 display modes as below:

- 1.Time/Watt/Cost Display
- 2.Time/Cumulative electrical quantity Display
- 3.Time/Voltage/Frequency Display
- 4.Time/Current/Power Factor Display
- 5.Time/Minimum Power Display
- 6.Time/Maximal Power Display
- 7.Time/Price Display
- 8.Overload Display

Package included:

- 1x Energy meter(US Plug)
- 1x Instruction

Almost Burnt My House Down

Reviewed in Canada on March 10, 2021

Verified Purchase

Would've burnt down my house if I wasn't home. Luckily I was right beside it when it happened.

Was running at well below capacity. Not sure what caused it.

Programming for US and Canadian dollars

Reviewed in Canada on December 4, 2018

Verified Purchase

I am using the meter to monitor the cost of running a second fridge in our home. Our electricity is billed in canadian dollars to four decimal points, \$0 .08840/kwh for the first 700kwh and \$0.13260 for the remainder. It would be nice if the unit could be programmed for both the dual rate and also in US or canadian dollars to 4 decimals. The work araound is to change pennies to dollars so that it reads \$8.840/kwhr. Otherwise it appears to be a good product. We will see in a month or so as it has only been in use for a week

Easy to configure (\$/KWhr) and great readings

Reviewed in Canada on February 26, 2020

Verified Purchase

This is a great little device to see how much appliances cost to run. I have 2 fridges and 2 freezers so will see how much each of those cost. They say older appliances are less efficient - will now see if that is true or not. The newer ones certainly don't last as long - so that had to be part of the over all cost of ownership. Follow up - my older freezer draws 2 amps and after a week of monitoring, will cost about \$15 per month to operate and the newer one which is larger uses 1 amp so probably will cost less and has a much better power factor .9 vs .5. Maybe I'll add a capacitor to the old freezer - or time to get rid of it. Will be interesting to monitor the fridges. Updates to come.

Super, calcul consommation électrique

Reviewed in Canada on June 28, 2020

Verified Purchase

Moniteur analyse consommation électrique vraiment efficace. Je l'ai acheté pour lire la consommation de mes appareils énergivores pour savoir quelle wattage je dois me procurer de ma prochaine génératrice que je dois acheter en cas panne de courant. Bref voir les appareils indispensable en cas de panne seront prioritaires. Je conseil vraiment cette achat. Juste un bémol, vu qu'il est branché dans le 120 volt, ça aurait pas été dure qu'il est le rétroéclairage, l'écran est sombre et ça prend une lumière externe pour voir la lecture.

Accuracy could be improved and unnecessarily difficult to use

Reviewed in Canada on January 14, 2020

Verified Purchase

This could be a good product were it not for the awkwardness of its interface, the lack of appropriate amount of digits in the cost (2 decimal places vs 4 that it should be) and the terribly written instruction manual in chinglish.

Craig

Accurate reading but display is very dark and hard to see.

Reviewed in Canada on March 16, 2020

Verified Purchase

The unit shows accurate power consumption readings and the built in battery is nice to save data in the internal memory. My only wish is I should have got a unit with backlight as this one is very hard to see even when looking straight on.

Works as shown, one small issue

Reviewed in Canada on November 25, 2018

Verified Purchase

The most important thing, is the price is right and it does what it should do. Only problem I see is it cannot get to a three or four decimal value. For example. Cost setting allows you to enter 00.00 price/kWh , but power is measure here at 0.0000 price/kWh.

So I had to round up or down. Unless there is a means to move the decimal point .

Great Product

Reviewed in Canada on November 30, 2018

Verified Purchase

Did the basic function I was looking for... great deal.. fast delivery at a GREAT price

as an Engineer, I would like to see added into this product, WioFi connectivity, App (iPhone) access, and direct upload to a spreadsheet for analysis... that would be great!
